## EVERGREENS

Prices are for Evergreens Securely Balled and Burlapped.

Can dig Evergreens, roots puddled at the following reduction in price:

12 to 18 inches at 12c. 18 to 24 inches at 15c. 2 to 3 feet at 20c.

Our Evergreens have all been three times x x x transplanted, having been grown with plenty of room for development. Have been properly sheared and pruned for producing compact, symmetrical specimens.

Evergreens selected and tagged by customers in the nursery field will be subject to a 10% additional charge.

Height specified after variety indicates height tree should obtain at maturity.

We cannot assume responsibility for the successful transplanting of Evergreens, as weather conditions, method of handling and care govern results secured and are sold with the distinct understanding that if they arrive in good condition and are accepted, our responsibility ceases.

### FIR, Abies

#### CONCOLOR, White Fir. 50-60 ft.

Per 10      Per 100

This is, by far, the most outstanding Fir. It withstands severe winter conditions, and survives summer heat better than other Firs. The color runs from pale green to light blue. The leaves are long, soft, and pungent. It develops into a narrow pyramid of shapely, symmetrical form. When small, it has a tendency to grow rather irregularly, but assumes a symmetrical even growth as it grows older. The trees offered are the type from the Rocky Mountains of Colorado. This tree has been and will continue to be a great favorite for specimen planting.

**JUNIPER, *Juniperus*****CHINENSIS, Chinese**

A native Juniper of Asia where it covers large areas. The needles are sharp and prickly, light green with a slightly bluish cast. It averages 15-20 feet, and varies in habits from narrow and columnar to broad and cone-like specimens. This is the mother plant from which many horticultural varieties have developed. It is sometimes used as an understock for grafting Junipers. Recommended for all sections of the country and will thrive in almost any soil except heavy rich ground or poorly drained soil.

**NEW HORIZONTAL EVERGREENS**

The following junipers are natives of the Rocky Mountain region. These varieties  
were selected for their beauty, compactness and hardiness and have proven a  
great asset to us who find many needs for low growing ground covers.

**ADMIRABILIS (Admirable)**

Habit of growth is horizontal but it  
is so compact that it makes a solid  
mat of evergreen, covering the  
ground completely. Foliage bluish  
green. Grows 6 to 8 inches high.  
Spreads rapidly, yet retains its com-  
pactness. A very fine plant to use for  
covering graves, terraces or any  
place where a low beautiful covering  
is wanted.

**ADPRESSUS**

This juniper differs some from the  
others, although it is of the same  
species. Its foliage is more green  
with very prominent whitish-green  
pointed tips. Entire plant grows so  
tight to the ground that it resembles  
being pressed against the earth.  
Grows 4 to 6 inches high. Spreads  
rapidly making a fine covering.

**FILICINUS MINIMUS (Fern-like)**

This pretty little juniper is also a  
variety of the Rocky Mountains. It  
is one of the finest foliated ever-  
greens of the juniper family. Its  
short horizontal limbs covered with  
delicate small branchlets forming  
fern shaped branches makes it a gem  
for the rock garden or any other  
place that a slow growing prostrate  
evergreen is desired. Grows 4 to 6  
inches high, spreads slowly and is  
very compact. Green foliage.

## GRAFTS FOR LINING OUT

Our Juniper Grafts are worked on heavy J. Virginiana under-stocks in 2½ inch pots, (Scopulorum under-stocks used on request at a slightly higher rate) delivery about May first.

Ask for prices on varieties wanted.

## EVERGREENS FOR LINING OUT

The make up and handling of this line of stock means success or failure to the planter. Our trees are grown in a rich, sandy loam which is responsible for the wonderful root system they acquire. With our rapid method of digging, handling and shipping the customer is assured of good results as far as the stock is concerned.

NOTE: Root Pruned grades are available for SPRING SHIPMENT ONLY except, GRAFTING STOCK, which can be shipped any time after SEPTEMBER 1st, weather being favorable for digging. We recommend that understocks to be potted and put into greenhouse for winter grafting to be ordered for October shipment and left to our judgment as to the exact shipping date and we will notify you a few days before shipment is made.

NOTE: We will not be responsible for stock after delivery to carrier.

We are sure customers would almost eliminate any chance of losses if they would prepare to plant our stock when it is ready to move instead of having it moved when they are ready to plant. Experience is valuable if put to use.

KEY: T—Transplanted one or more times.

RP—All tap roots severed by special root pruning device.

We assure you that our T. and RP. stock will have no tap roots or heavy side roots.

RATES—50 of any variety and size at 100 rate.

300 of any variety and size at 1000 rate.

Mixed orders of one thousand or more and not less than twenty-five of a variety and size at thousand rate.
